POWER LEARN PROJECT | CAPSTONE VENTURE

SpendWise

Smart personal finance management built for modern African digital economies.

The Problem

Everyday consumers struggle with financial visibility across fragmented digital wallets.

Fragmented Accounts

Scattered balances across mobile money and banking apps.

Zero Tracking

Lack of automated expense categorization leading to overspending.

Low Savings Rate

Absence of smart budgeting tools for long-term emergency funds.

The Solution: SpendWise

A unified platform that simplifies financial tracking and automates savings.

Unified Dashboard

Single view for all bank accounts and mobile wallets.

Smart Categorization

Automated tagging of daily expenses and alerts.

Goal Automation

Micro-savings rules that build wealth effortlessly.

Market Opportunity

Rapidly expanding smartphone penetration and digital payments across Africa.

$45B

Total Addressable Market in mobile fintech

65%

YoY growth in digital wallet adoption

Product Architecture

Built on secure backend pipelines and intuitive user interfaces.

Interactive UI

Clean web dashboard built with responsive HTML and modern CSS styling.

Robust Logic

Python modules handling data validation, calculations, and exception management.

Business Model

Sustainable revenue streams driven by freemium tiers and partnerships.

Freemium App

Free basic tracking with premium advanced analytics subscription.

API Integrations

B2B partnerships with micro-lenders and digital banks.

Competitive Advantage

Why SpendWise outperforms legacy spreadsheets and bank apps.

Localized Design

Built specifically for regional mobile money payment ecosystems.

Zero Friction

Instant setup with automated SMS and notification parsing.

Go-to-Market Strategy

Scaling rapidly through digital communities and strategic channels.

Campus Ambassadors

Targeting university tech hubs and young professionals.

Digital Campaigns

Financial literacy content across social media platforms.

The Team

Dedicated builders trained through the Power Learn Project.

Fuad Mohamed Abdi

Lead Software Engineer & Founder

Experienced in Python systems architecture, database design, and robust web applications.

Roadmap & Milestones

Our strategic timeline for growth over the next 12 months.

Q1 2026

Core MVP development and security hardening.

Q2 2026

Beta launch and initial user feedback integration.

Q3–Q4 2026

Regional expansion and banking partnerships.

Current Traction

Solid engineering foundation already established on GitHub.

100%

Core error handling & modular tests passing
